

OUR COMPANY

Sky Park creates smart parking solutions for cars, bikes, and scooters, maximizing space and efficiency where traditional methods can't. We offer consulting, design, and implementation to help businesses and communities adopt modern, easy-to-use parking systems.

✓ Trusted By Our Clients

We provide smart, reliable parking solutions trusted by businesses and communities—making parking safer, easier, and more efficient

✓ Quality in Every Detail

We believe in quality in every detail. From start to finish, we pay attention to every step to make sure everything is done right. It's not just about meeting expectations—it's about delivering the best results, every time

Easy Park, Easy Go!

"Easy Park, Easy Go" reflects the simplicity and convenience Sky Park offers whether you're parking for a quick errand or heading out for a long journey, the process is smooth and stress-free. It's all about saving time and making parking effortless!

Bike Hub – Smart Parking for Urban Mobility

Bike Hub is an innovative modular parking hub designed for alternative mobility providing a safe and efficient solution. The system connects residential neighborhoods with central zones, strategically positioned in areas with access to public transport. Offers parking for scooters, bicycles, and e-bikes, along with Easy Box storage. The Smart Box compartments provide secure storage for personal items, with the entire system easily accessed via a QR code scan.

Safe & Secure Hub

Bike Hub offers a modern and secure solution for alternative mobility. The Easy Box ensures safe storage, while the entire system operates through a QR code on the screen. Vehicles are protected with advanced locking systems, including bike locks offering safety and convenience for users.

Powered by the Sun

The bike hub runs on solar power, making it eco-friendly and self-sufficient. Its high-efficiency panels provide reliable energy for lighting, charging, and smart features. Clean, cost effective, and always ready to power your ride with sustainable energy.

Sustainable

With solar panels for sustainable energy

Modular

Easy to install, move, adapt

Smart

User-friendly with digital control features

Secure

Safety ensured by advanced tech solutions
